Reference letter
to the use of the MD BIOL (feedback)

I observed three patients, which suffering with *nasopharyngeal carcinoma, ankylosing spondylitis and colorectal cancer*.

They used the MD BIOL during (one) year (2017-2018) receiving the treatment 3-4 times per week, each session lasted 2 hours. There were no interruptions in the treatment.

The regression of disease in all three patients during the treatment was indicated (based on CT). The quality of life has been improved significantly.
